The Accredited Registers Scheme for Healthcare Professions (AR Scheme)

accredits eligible professional organisations of healthcare professions currently not subject to statutory registration with a view to ensuring the governance of the professional bodies, professional competency of healthcare personnel, and providing more information for the public to make informed decisions when choosing healthcare service providers.

Under the principle of "One Profession, One Professional Body, One Register", the Hong Kong Institute of Clinical Psychologists (HKICP) has been authorised by the Department of Health as the accredited healthcare professional body responsible for administering the register of clinical psychologists.

The HKICP is permitted to use the Accreditation Mark on its website and Certificates of Registration issued to its members. Members of the HKICP can use the title "Clinical Psychologist in Accredited Register" on their name cards for easy identification by the public.
